

## Our offer:

- Galvanic surface treatment
- Tinned plated, galvanized and with a nickel / chrome surface coated heat exchangers
- Production of scale, as well as medium and small batches possible, single piece production by request
- Surface finishing on aluminum, copper, copper-nickel and unalloyed steel

## Advantages:

- Function as corrosion protection,
- Wear protection and reduction of friction forces
- Longer resistance of corrosion-prone and elaborately manufactured functional parts
- Chrome coating as an alternative for plastic heat exchangers
- Tin coating can serve as a sacrificial anode
